

Fire & Security Services

*Unrivalled levels of in-house capabilities
& service in everything we do.*

A Company Well Connected

Fire & Security

Backed up with NSI NACOSS Gold and NSI Fire Gold Accreditation, we operate to the highest industry standards across the UK.

There are certain assets that money cannot replace, and based on this core principle, after a brief understanding of your requirements HF Fire and Security can offer a solution that best suits your business needs.

Our clients range from one off domestic properties or single unit business all the way to large high st names. We can take care of all your fire and security services throughout the year and throughout the country.

We firmly believe in excellent client communication and the entire division puts this at the hub of everything we do. Our engineers have first-hand knowledge of all projects and vast experience of multi-discipline works. It all adds up to a service fully focused on protection and delivery your requirements on time and on budget – because anything else, quite simply, won't do.

We provide:

Fire Alarm Systems

Fire Suppression and Sprinkler Systems

Fire Extinguishers

Fire Risk Assessments

Fire Door Inspection

Dry Riser Maintenance

Emergency Lighting

Security Alarm Systems

CCTV Installation

Access Control Systems

Door Entry Systems

Automated Gates, Turnstiles and Barriers

Keyholding

24/7 Security Monitoring

24/7 Call Out Service

“

HF has a 'can-do', proactive approach to their work," adding "I would recommend them to others for routine, emergency and project works.

”

Jeanette Roberts, Health and Safety Manager
Scottish Rugby

Our Services

Fire Alarm Design, Installation, Commissioning and Maintenance

Fire Alarms Systems are vital to help prevent, detect and control the spread of fires in domestic and commercial premises. We can offer a comprehensive service for all aspects of fire alarm systems. From the installation of fire alarm and monitoring systems, to the maintenance of existing fire alarm systems. Our Fire and Security Services are NSI Gold and NSI Fire Gold accredited.

All it takes is one call and our multi disciplined engineers can handle any type of issue. All operatives liaise in real time with the service desk using hand-held devices. Jobs are allocated instantly and in turn, they can relay updates back to the client or access full history – all at the touch of a button.

Fire Suppression and Sprinkler Systems

We can design and install gas fire suppression and sprinkler systems to help control and eliminate fires in any environment be it data server rooms that require gas fire suppression systems to retail store environments that have a high volume of daily foot traffic.

Fire Extinguishers

Fire extinguishers are an essential safety measure for the control and elimination of fires in the workplaces. Often overlooked in the day to day working environment, fire extinguishers are none the less, one of the first things that you look for in the event of a fire.

We can provide initial site surveys that will allow us to understand both the site layout of your premises and what type of fire extinguishers you need and how many need to be installed.

Our Fire Extinguisher Services covers:

- Fire Extinguisher Servicing and Maintenance
- Initial Fire Extinguisher Sales, Supply and Installation
- Fire Extinguisher Refill and Recharging Service
- Fire Extinguisher Stands, Cabinets and Fitting Service
- Fire Blankets
- Safety Signs

Fire Risk Assessments

No matter what sector of business you are in, a workplace fire risk assessment is a vital tool to identify fire risks and the dangers that can be caused by fire. All in order to create an action plan for what can and should be done to improve existing procedures and protocols on the premises. A Fire Risk Assessment includes photographic examples of hazards and risks within your business premises along with advice on required actions to fix these problems.

Fire Door Inspections

Fire doors are critical to prevent fires from spreading quickly through a building whilst allowing those in the building to quickly evacuate the immediate danger zone. Fire doors help to stop the spread of fire and dangerous smoke while protecting the all important evacuation routes of a site premises.

Our fire door inspection service includes evaluating the structural integrity of existing fitted doors, looking for signs of wear and tear that could hinder their effective functionality.

Dry Riser Maintenance

Regular testing and maintenance of dry risers is essential to ensure that the fire equipment is in proper working order. Dry risers are vital for Emergency Services Fire Fighters as they battle to contain fires from spreading.

The 2015 British Standards BS9990 lays out current recommendations for dry riser testing, maintenance and servicing across the country, recommending periodic visual inspection of dry riser equipment every six months with a more detailed test each year.

Domestic Smoke and Heat Alarms

The Smoke and Heat Alarm market is filled with a huge range of detector system. Each tailored to unique building requirements.

There are optical and ionisation smoke and heat alarms, aspirating alarm systems and multi-sensor alarms. Battery powered, mains powered, low voltage systems, standalone...the list goes on.

Our NSI accredited engineers can advise you on the right solutions to fit your fire alarm needs.

Emergency Lighting Design, Installation and Maintenance

We all pray that we never have to go through the dangers of a building fire. But it can happen and this is when an emergency lighting system can become a truly vital safety feature for your business.

Emergency lighting helps to highlight the exit routes, doors, stairways and firefighting equipment in a building. Emergency lighting has to, by law, be fitted to every commercial building in the UK and needs to be maintained to ensure that it is in good working order.

Annual emergency lighting tests need to be carried out by trained Fire Alarm Servicing Companies such as ourselves and the test results need to be recorded with any faults in the system noted and resolved as soon as possible.

24 Hour Call Out Service

Fire & Security

Fully accredited to NSI Gold standards, our 24 hour manned call out service provides our customers with year round reassurance that help is quickly at hand should an emergency arise.

With a maximum 4 hour response time for our call out services 24 hours a day, our qualified Fire & Security engineers are also available through fast acting telephone support to provide instant solutions to many of the most common fire and security issues that you may encounter. With offices across the UK, we can provide rapid response for your business, no matter where you are located.

24 Hour Monitoring

Fire & Security

Providing your business with fire and security monitoring coverage throughout the year. Our customers receive their very own customisable service that is bespoke to their individual business needs.

With our accredited team on standby nationwide 24/7, we are always just a call away for any planned or reactive work requirements.

“

Absolutely delighted with the service received and works carried out by HF”

Intruder Alarm Design, Installation, Commissioning and Maintenance

Feeling safe in your own home should be a guarantee. A state of the art intruder alarm system will go a long way towards achieving that goal.

Our engineers can design intruder alarm systems suited to your homes layout and day to day needs. For example, if you have a pet, then our pet friendly detectors are the perfect solution.

We strive to offer you the very best in home alarm system design, monitoring and maintenance plan by offering a fully customised alarm system design, installation and maintenance package so that your home, your possessions and your loved ones are secure.

With 24 hour monitoring and advanced online tracking, you can even keep an eye on your property while on the move.

CCTV Systems

Providing 24/7 monitoring cover for your business and premises with state of the art CCTV systems fitted with the latest in security technology including motion detection, thermal vision and biometric recording.

Our CCTV systems can link in real time to mobile phones for 'on the move' 24/7 monitoring and we offer customisable client specific solutions for multiple service sectors across the UK looking for a superior service and the added protection and security that CCTV and 24/7 monitoring can bring.

Access Control Systems

The sky is the limit when it comes to access control systems. If you are simply looking for a security system for low risk door access (such as the back door of a restaurant) then mechanical systems are an ideal and cost effective solution. But when you enter the digital world of code lock systems, you can begin to tap into a wide spread of additional benefits for businesses that need help in managing and monitoring a lot more in their daily business activities beyond just security.

This can include:

- Contactless Clock In/Clock Out Systems
- Area Access Restrictions
- Thermal Screening
- Fire Safety
- Staff Rotas

“

Firstly I would like to thank you and your team for all the hard work that has gone into installing this CCTV system. The engineers were both very conscientious about keeping me informed about progress and asking about cable runs etc.

”

Matt Howard
Bardyke Chemicals

Door Entry Systems

Whether restricting access to set areas of a commercial premises or working in tandem with other fitted security and fire systems, a door entry system offers users a convenient standalone solution that provides easy access to low, medium or high security risk entry points whilst doing away with conventional keys which can be cumbersome easy to loose and hard to track.

There are a huge range of door entry systems available to suit almost any security need. From heavy duty mechanical push button lock systems for minimal security access to sophisticated digital systems that are compatible with NFC and MIFARE systems as well as intruder alarm security systems.

Automated Gates, Turnstiles and Barriers

Our Fire & Security Engineers can design, install and maintain barrier systems, turnstiles and security gates for multi-occupancy sites and domestic and commercial properties nationwide. Working in tandem with our access control systems, automated gates, turnstiles and barriers can be tailored to suit your requirements and provide your business with a heavy duty method of access control.

Key Holding

The risk of fire and break-ins are not confined to the working hours of 9-5. Emergency call outs can happen at any time of day; and with little to no prior warning for the keyholder.

At HF, we provide a confidential and secure key holding service for predetermined sites or a portfolio of properties. This allows us to quickly respond to, and attend, an emergency alarm response or complete a scheduled fire & security inspection plan without requiring client attendance.

With senior-level hands-on management from initial planning to final handover, and with the opportunity to tap into a wide range of varied services and associated consultants with a skills base and command of technologies which are second to none.

A Company Well Connected

A Company Well Connected

Manned 24 hour Call-out Service

Across the UK, the name HF Group occupies an unprecedented position in industry.

HF's family culture stretches back over three centuries in business yet it means much more than dates and numbers. It's quite literally, the core of our business.

We have diversified and developed abreast of industry advancements and have grown into a group of world-class companies leading the way in next-generation technologies; and all with a family continuity at management level which is rarely seen.

With hands-on management from initial planning to final handover, and with the opportunity to tap into a wide range of varied services and associated consultants, we are more than just another service contractor.

Electrical

From Electrical Installations to Planned Maintenance Contracts, quality service and peace of mind are the principles on which the Fulton family founded the company and its electrical services all those years ago, and it's just as important today.

Providing Manned 24 hour Call-out Service nationwide, we are the first choice for some of the country's leading businesses.

Mechanical

HF Mechanical provides a full range of Mechanical, Ventilation, HVAC and Refrigeration services.

Delivering innovative solutions regardless of contract value or size, our business is based on our customers' needs.

That means professionalism, honesty and reliability, 24 hours a day, 365 days a year.

Plumbing, Heating & Air Conditioning

From industrial heating installation and maintenance to plumbing systems, air conditioning installation and servicing and Manned 24 hour Call-out Service.

We specialise in all commercial, retail and domestic plumbing, heating and air conditioning services nationwide.

Fire & Security

Offering complete business fire and security solutions in an every-changing environment.

Our Fire and Security Services are NSI Gold and NSI Fire Gold accredited and we can design, install and offer maintenance contracts for Fire Systems, Access Control Systems, CCTV and Intruder Alarms nationwide. All backed with Manned 24 hour Monitoring and Call-out Service.

Comms

Celebrating 25 years since it all began, few industries are as fast moving as the communications sector and even fewer are as competitive.

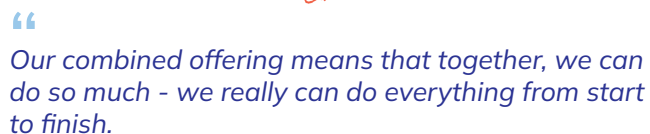

HF Comms is a leading telecommunications division that delivers engineering, design, construction & project management for a full range of telecommunications services across the UK.

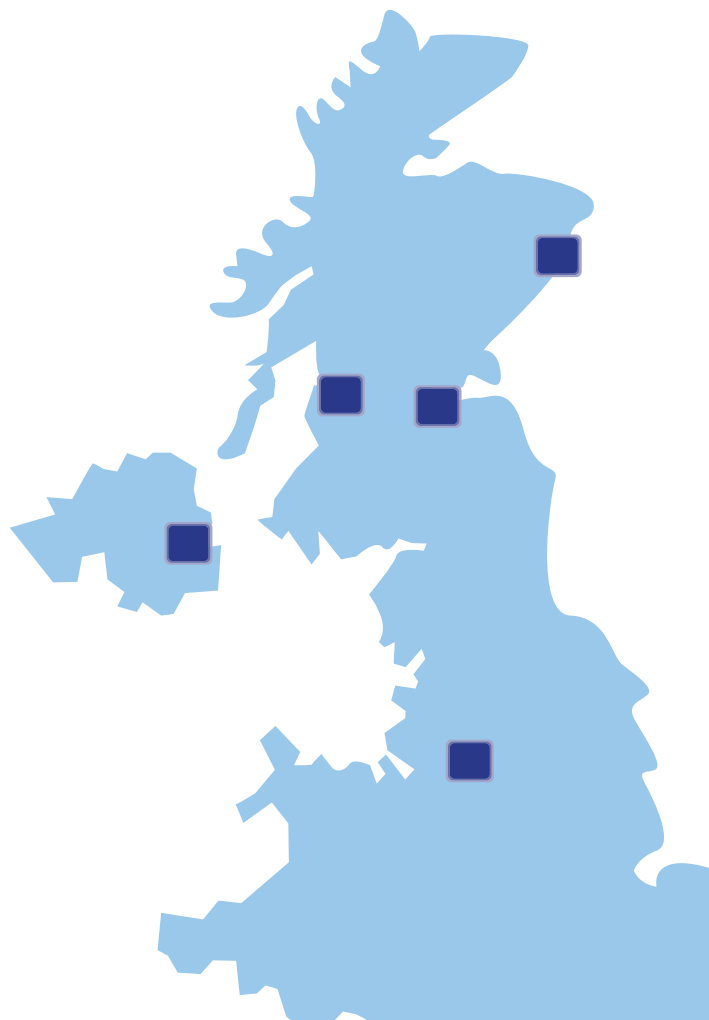

Automated Controls

Offering our customers hands-on management for the entire project, from start to finish, to give you total peace of mind.

We're continuing to grow and develop, embracing new automation and IT technologies as they emerge.
